Summary of Qualifications

An upcoming graduate of the Computer Networking & Systems Admin program at Texas State Technical College who is seeking long term employment with an organization that will allow me to apply my skills for the betterment of the company, and to increase my knowledge. I believe that success can be found in staying inquisitive, collaborating with others, and consistently setting and achieving goals. I would be a great asset to your organization because of my passion for learning about the different aspects of computer technology, dependability when tasked with various tasks and responsibilities, and effective communication skills in relation to explaining computing concepts to users and asking questions from the peers in my field.

Technical Skills

- Computer and Networking
 - Assembly and repair of PC components, setup of LAN topologies (routers, switches, ethernet cables), proper Data Storage
- System Maintenance
 - Configure and setup in Microsoft OS, troubleshooting network problems, virtualization (VMware)
- Security Maintenance
 - Setup security for networks and users, apply CIA practices to secure information, control a system through Authentication, Authorization and Accounting
- Database Management
 - Proficient with SQL, diagramming with Visio and Figma, spreadsheet reports from database (Excel)
- Programming
 - Fix minor bugs and add minor features (VS Code, Github), write scripts (JavaScript, Python)
